

## JAVA CONFIGURATION INSTRUCTIONS

### For Windows

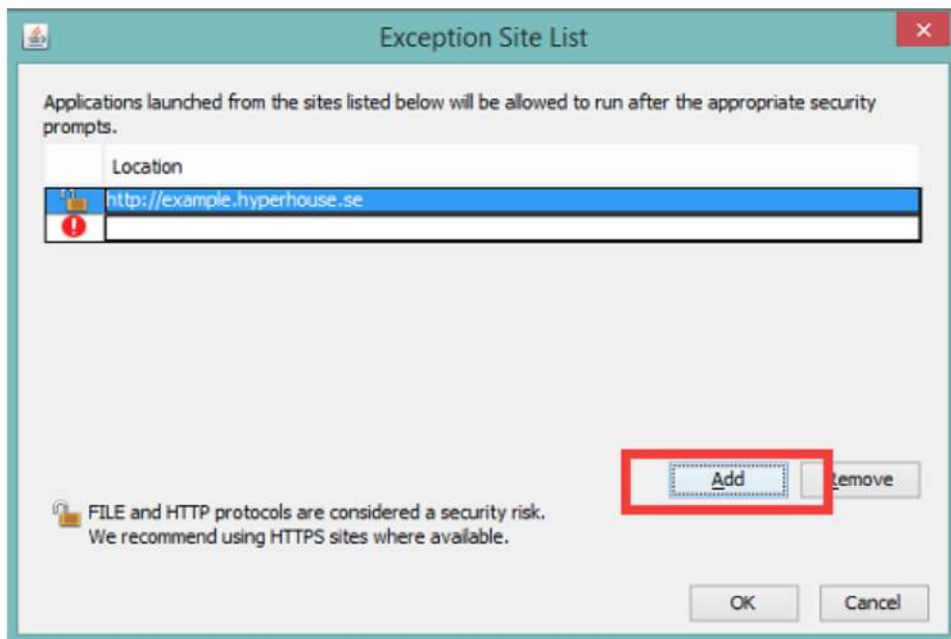

1. Go to Control Panel, then look for **Java**. (Tip: Type in “Java” on the search bar inside the Control Panel window)
2. The **Java Control Panel Settings** will open. Go to **Security** tab and change the Security Level from **High** (minimum recommended) to **Medium**. Click **Ok** and **Apply**.

3. If you have a higher version of Java Installed (Java 8), click on **Edit Site List...**

The **Exception Site List** will open, click on **Add**, and type in: <https://uis.up.edu.ph:4463>. Click **Ok** and then **Apply**.

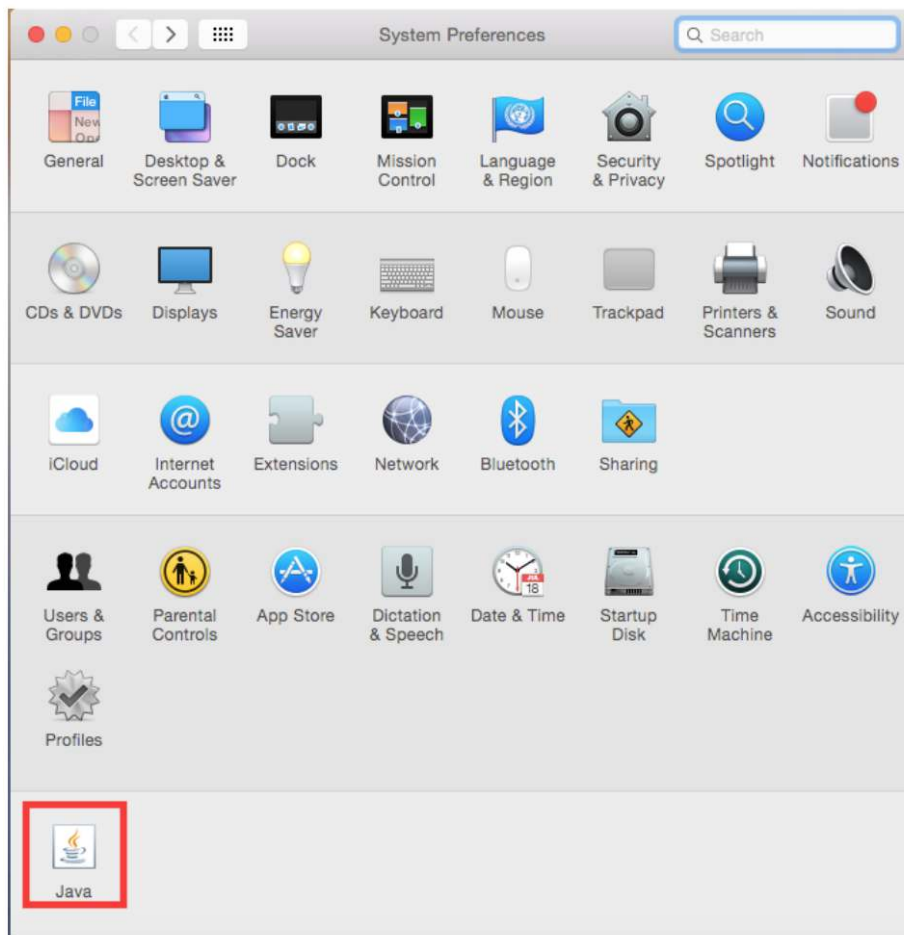

## For Mac

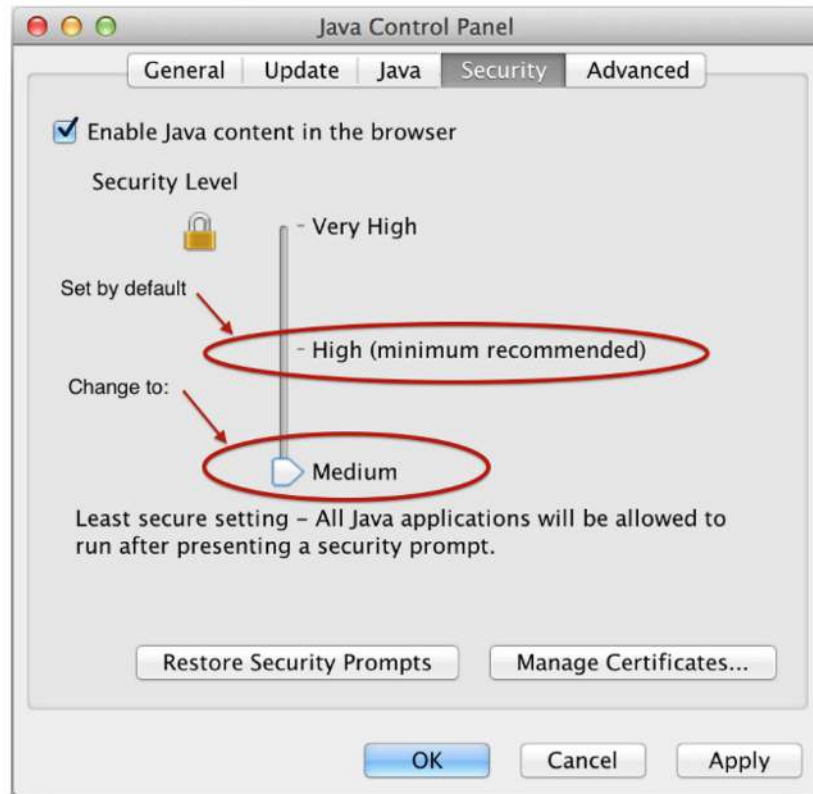

1. Click on the **Apple Icon** and go to **System Preferences**.

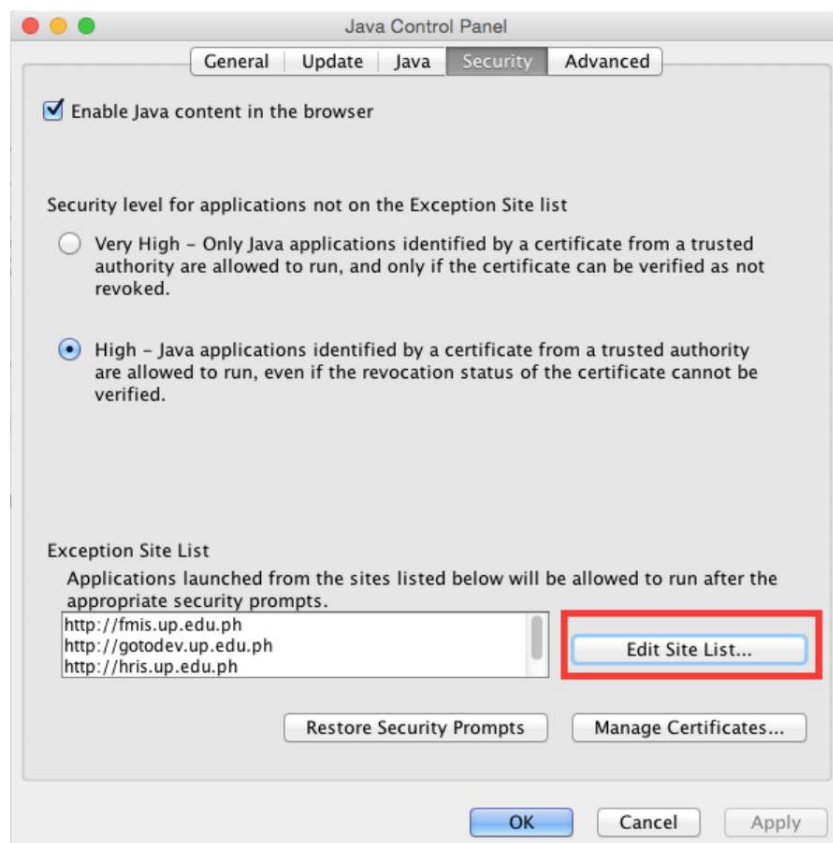

2. The System Preferences window will open. Go to **Java**

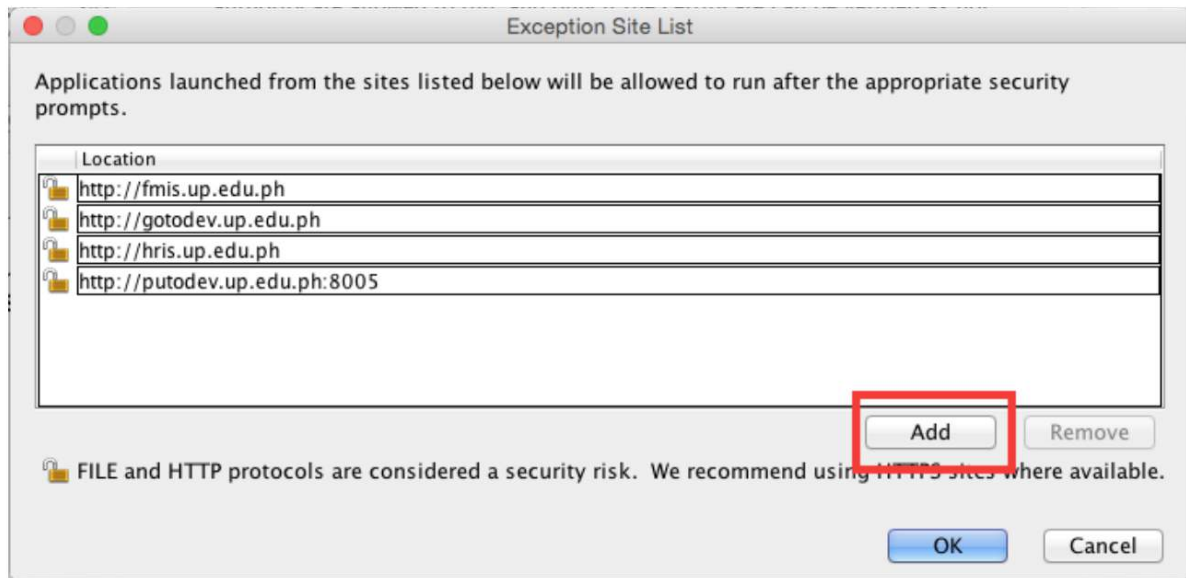

3. The Java Control Panel window will open, go to **Security** tab and change Security Level from **High** (minimum recommended) to **Medium**. Click **Ok** and **Apply**.

4. If you have higher versions of Java (Java 8), click on **Edit Site List...**

Click **Add**, then type <https://uis.up.edu.ph:4463> to the Exception Site List. Click **Ok** then **Apply**.

**BROWSER SETTINGS FOR FIREFOX ESR (Ver. 52.8.1) USERS** - Update the Exceptions List on the Firefox Browser with the steps below:

1. Click **Open Menu (icon with three lines on the upper right corner) > Preferences**
2. Click the **Content Tab**, then click **Exceptions**
3. Enter <https://uis.up.edu.ph:4463> the **Allowed Sites - Pop-ups**
4. Click **Save Changes**

Please use Mozilla Firefox ESR (Ver. 52.8.1) for UIS transactions that deploy the Java Applet. For self-service transactions, other browsers (Chrome, Safari etc.) may be used.
